

## GEBZE PLASTICS ORGANIZED INDUSTRIAL ZONE QUALITY, ENVIRONMENTAL AND ENERGY EFFICIENCY POLICY

In accordance with quality, environmental, and energy standards and relevant legislative requirements, our objective is to meet the needs and ensure the satisfaction of our internal and inter-institutional stakeholders, as well as our participants, through our continuously improving services.

While achieving this objective, we commit and declare to:

- **Adopt the total quality philosophy** to reach corporate and departmental goals with a team spirit, and encourage innovative and creative approaches.
- **Review our business processes** with a risk and opportunity assessment perspective to implement approaches that will improve our performance.
- **Increase efficiency in our business processes** through data management, utilizing digital tools and solutions in line with the continuous improvement approach, and raise quality awareness among all our employees and stakeholders.
- **Ensure the efficient use of natural resources** along with the necessary equipment to achieve the goals of designing activities for improving energy performance and procuring energy-efficient products and services.
- **Prevent pollution with a life-cycle perspective** to achieve sustainable development, reduce waste within the framework of the "Clean ENVIRONMENT, Clean OIZ..." vision, and protect the global natural balance by disposing of waste using appropriate methods at competent facilities.
- **Reduce greenhouse gas emissions** that cause climate change for a more livable world.
- **Fulfill the core principles** required to ensure the continuity and sustainability of economic, social, and environmental conditions.

We commit and declare.
